

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

SCIENCE

A WEEKLY JOURNAL DEVOTED TO THE ADVANCEMENT OF SCIENCE, PUBLISHING THE
OFFICIAL NOTICES AND PROCEEDINGS OF THE AMERICAN ASSOCIATION
FOR THE ADVANCEMENT OF SCIENCE.

FRIDAY, OCTOBER 19, 1906.

CONTENTS.

<i>The Jubilee of the Coal Tar Color Industry:</i> —	
<i>The Influence of Sir William Henry Perkin's Discovery on our Science:</i> DR. HUGO SCHWEITZER	481
<i>Address of Sir William Henry Perkin</i>	488
<i>Reform in Mathematical Instruction:</i> PROFESSOR G. A. MILLER.....	493
<i>Scientific Books:</i> —	
<i>Stephens's California Mammals:</i> DR. J. A. ALLEN. <i>Morat's Physiology of the Nervous System:</i> PROFESSOR EDW. ANTHONY SPITZKA	496
<i>Scientific Journals and Articles</i>	498
<i>Discussion and Correspondence:</i> —	
<i>Cats as Plant Investigators:</i> DAVID FAIRCHILD	498
<i>Special Articles:</i> —	
<i>Evidences of Several Glacial and Interglacial Stages in Northeastern New England:</i> FREDERICK G. CLAPP.....	499
<i>Current Notes on Meteorology:</i> —	
<i>The Fire-ship of Bay Chaleur; Monthly Weather Review; Börnstein's 'Leitfaden der Wetterkunde'; The Cyclonic Theory; 'Some Facts about the Weather': PROFESSOR R. DEC. WARD</i>	501
<i>Yale University</i>	502
<i>Scientific Research</i>	505
<i>A Memorial to Herbert Spencer</i>	505

THE JUBILEE OF THE COAL TAR COLOR INDUSTRY.

THE INFLUENCE OF SIR WILLIAM HENRY PERKIN'S DISCOVERY UPON OUR SCIENCE.¹

I NEED hardly assure you how highly honored I feel to be permitted to speak here to-night. Yet I am fully aware that the committee did not select me because it considered me the most competent of our chemists to respond to this subject, but because so many of our colleagues refused to be heard, fearing the arduous labor of condensing this vast material within the limits of a fifteen-minute address, when fifteen hours could be devoted to it with much less difficulty and work. With me, however, it was a labor of love, and I accepted with pride and pleasure, inspired by the wonderful development of this industry in which I have been an attentive watcher and a modest coworker, it being just twenty years since, in collaboration with Professor Bernthsen, I began the investigations which finally culminated in the discovery of the constitution of the dye-stuffs of the safranine series. Above all, I have been inspired in my task by the genial personality and refined modesty of our distinguished guest, Sir William Henry Perkin, with whom I had the pleasure of becoming more intimately acquainted during last year's meeting of the Society of Chemical Industry in London. It must be a sincere source of congratula-

MSS. intended for publication and books, etc., intended for review should be sent to the Editor of SCIENCE, Garrison-on-Hudson, N. Y.

¹ Given at the banquet given to Sir William Henry Perkin, at Delmonico's, New York City, October 6, 1906.
